Subject: Announcing NASA's HR Messaging System (HRMES)

Importance: Normal

---

NASA Employees:

The Office of Human Capital Management is pleased to announce the launch of NASA's Human Resources Messaging System – HRMES. This new communications tool was developed to meet your unique needs, to provide Human Resources (HR)-specific messages relevant to you and only viewable by you – based on your benefits program, your duty location, your retirement status, your group affiliation (such as project manager, supervisor, occupational group), and much more.

HRMES uses both e-mail and the HR Portal (<https://hr.nasa.gov>) to deliver messages to targeted audiences. These messages will often include links to further information about the subject of the message.

You will receive a variety of targeted HRMES messages. These messages will focus on topics such as changes to your benefits provider, benefit changes affecting your specific health benefit coverage, and significant anniversary dates that could impact your benefits or retirement coverage. You will also receive HRMES messages when new HR initiatives or changes affect you personally. And, if you are a supervisor or project manager, you will receive messages specific to your role.

Look for your important notices in your inbox and in the “My HR Messages” Portlet on the [Employee Page](#) of the HR Portal.

With the launch of HRMES, NASA will be highlighting several of our employee benefits and workplace flexibilities. Over the next several months, HRMES and the HR Portal will feature those work/life programs that you have expressed more interest in knowing about through your responses to Employee Viewpoint Survey and in other forums. We are excited about our new communications tool, and hope this is responsive to your needs.

LIVE - THRIVE – CONNECT
